Jorge Casanova

Mobile / Full-Stack Developer

Arequipa, Peru (remote) | linkedin.com/in/jorgecasanovadev | github.com/jorgecasanovadev | jorgecasanovadev.github.io

SUMMARY

Mobile / Full-Stack Developer with 7+ years of experience designing, developing, and deploying scalable mobile and web applications. Specialized in Flutter and Dart for Android and iOS, with hands-on experience integrating REST APIs, AWS services, Firebase Cloud Messaging, MQTT, and PostgreSQL and SQLite databases. Six applications shipped to Google Play, the App Store, and HUAWEI AppGallery, with a focus on user experience, performance, and offline capability.

SKILLS

Languages: Dart, Ruby, JavaScript, Python, SQL

Mobile development: Flutter, Android, iOS, Provider, MobX, Riverpod, Drift, offline sync, background location tracking, push notifications, Mapbox

APIs and integrations: REST APIs, HTTP, Dio, JSON, Firebase Cloud Messaging, MQTT, SAML single sign-on

Backend and web: Ruby on Rails, Vue.js, MVC architecture

Databases: PostgreSQL, SQLite, Firebase

DevOps and version control: AWS S3, CI/CD, GitHub Actions, build automation, release trains, Git, GitHub, GitLab, Git Flow, code reviews

App store delivery: Google Play Console, App Store Connect, TestFlight, HUAWEI AppGallery

Ways of working: Scrum, requirements analysis, collaboration with QA, backend, product, and design teams

Core strengths: problem solving, critical thinking, team collaboration, adaptability, effective communication, creativity

EXPERIENCE

Software Engineer - ZiYU

Full-time, Remote (Santiago, Chile) | December 2024 - Present

- Develop mobile and web features for ZiYU, a real-time transport logistics platform shipped to Google Play, the App Store, and HUAWEI AppGallery.
- Hardened MQTT-based live tracking, improving reliability and reducing latency across mobile and web.
- Built logistics-critical capabilities: trip state machine, real-time status updates, background location tracking, push notifications, and offline sync, giving drivers and dispatchers accurate live visibility.
- Orchestrated cross-functional developer workflows (branching, code reviews, release trains), reducing lead time from commit to store submission and increasing team throughput.
- Drove continuous delivery and UX and performance improvements with product, backend, and QA teams, streamlining CI/CD and monitoring.
- Promoted from Flutter Mobile Engineer to Software Engineer in May 2026, expanding into full-stack web development.

Technology and Innovation Consultant (Freelance) - VCA Peru

Remote | November 2024 - November 2025

- Continued delivering features and improvements for the Laraigo mobile apps as a freelance consultant, keeping the same scope of work.
- Led efforts to improve app visibility, performance, and user experience on Google Play and the App Store.
- Improved cross-department collaboration and streamlined mobile team workflows.

Mobile Engineer - VCA Peru

Full-time, Remote (Lima, Peru) | November 2023 - November 2024

- Developed and maintained the Laraigo apps in Flutter and Dart for Android and iOS, shipping new features and continuous improvements.
- Integrated REST APIs, handling JSON responses, authentication, validation, and error handling, and implemented push notifications with Firebase Cloud Messaging.
- Published and maintained the apps on Google Play and the App Store, resolving Android and iOS issues with permissions, dependencies, and builds.
- Improved CI/CD by automating builds and release distribution; worked with GitLab and GitHub through merge and pull requests and code reviews.
- Turned designs and functional requirements into reusable, responsive components alongside backend, QA, product, and design teams.

Mobile Developer (Freelance) - Fuel distribution project
Remote (Piura, Peru) | August 2023 - December 2023

- Developed a mobile app for fuel sales, delivery management, and administrative control, integrating Firebase with an MVC architecture.
- Improved data export and reporting efficiency by 20% through custom Excel export, delivering a multi-profile solution for retailers and agents.

Flutter Mobile Developer - AGROS
Full-time, Remote | October 2022 - April 2023

- Led mobile development of "Agros Connect", focused on offline and online functionality for rural users.
- Built offline features, including Mapbox integration for rural map downloads and local media storage with SQLite.
- Managed AWS S3 media synchronization and REST API consumption for seamless offline/online transitions in remote areas.

Ruby on Rails Developer (Freelance) - Independent
Lima, Peru | August 2022 - September 2022

- Restructured a travel agency's system, implementing modules and accounting logic in Ruby on Rails and improving views with plain JavaScript.

Software Analyst (Freelance) - Independent
Remote | June 2022 - July 2022

- Analyzed requirements and designed the system structure for an online courses platform, recommending a Flutter mobile MVP.

Full Stack Engineer (Freelance) - AgroTec SAC
December 2019 - December 2021

- Developed software to digitize farming workflows, migrating manual records to digital platforms and improving harvest management and reporting.
- Built backend services in Ruby on Rails and frontend interfaces with Vue.js.
- Developed a Flutter mobile app for iOS and Android with serverless storage, MobX and Provider state management, and REST API integration with cloud synchronization.
- Streamlined supply purchasing by connecting farmers to dealers, reducing costs and turnaround time.

Software Engineer Intern - Inngresa
Lima, Peru | March 2019 - May 2019

- Developed a Flutter mobile prototype to replace the desktop administrative system, with statistical charts and custom widgets for customer arrival tracking and state managed with Provider.

Software Engineer Intern - Inngresa
Lima, Peru | June 2018 - August 2018

- Implemented a support information page with SAML single sign-on and secure page-to-page connections, cutting calls to the support line by 50%.

OPEN SOURCE PROJECTS

- **DeepDayStack** (github.com/jorgecasanovadev/my_day_os): Local-first productivity app (day planner, tasks, Pomodoro, active breaks) with optional Google Calendar sync. Flutter, Riverpod, Drift.
- **junior to senior** (github.com/jorgecasanovadev/junior_to_senior): Offline-first interview preparation app with 200 reasoned questions, exercises, study roadmaps, and spaced repetition. Flutter, Riverpod, Drift, GitHub Actions.
- **Scraping Lab** (github.com/jorgecasanovadev/scraping-lab): Turns retail catalogues into normalized JSON, keeps price history, and detects fake discounts. Python, SQLite.

PUBLISHED APPLICATIONS

Laraigo, Agros Connect, Trade Assets Audit, SSTT D'onofrio, ZiYU, and ZiYU Guardia, distributed on Google Play, the App Store, and HUAWEI AppGallery.

EDUCATION

Full Stack Web Developer - MTPE / Certus - Lima, Peru | 2023

Industrial and Systems Engineering (coursework not completed) - University of Piura - Piura, Peru | through 2022

LANGUAGES

Spanish: native. English: B2 (upper-intermediate).
